The new special materials:
“Technotene”
strong and flexible
and “Antifrictiolene”
friction free

**Technotene pad strong
and flexible**

Technotene®

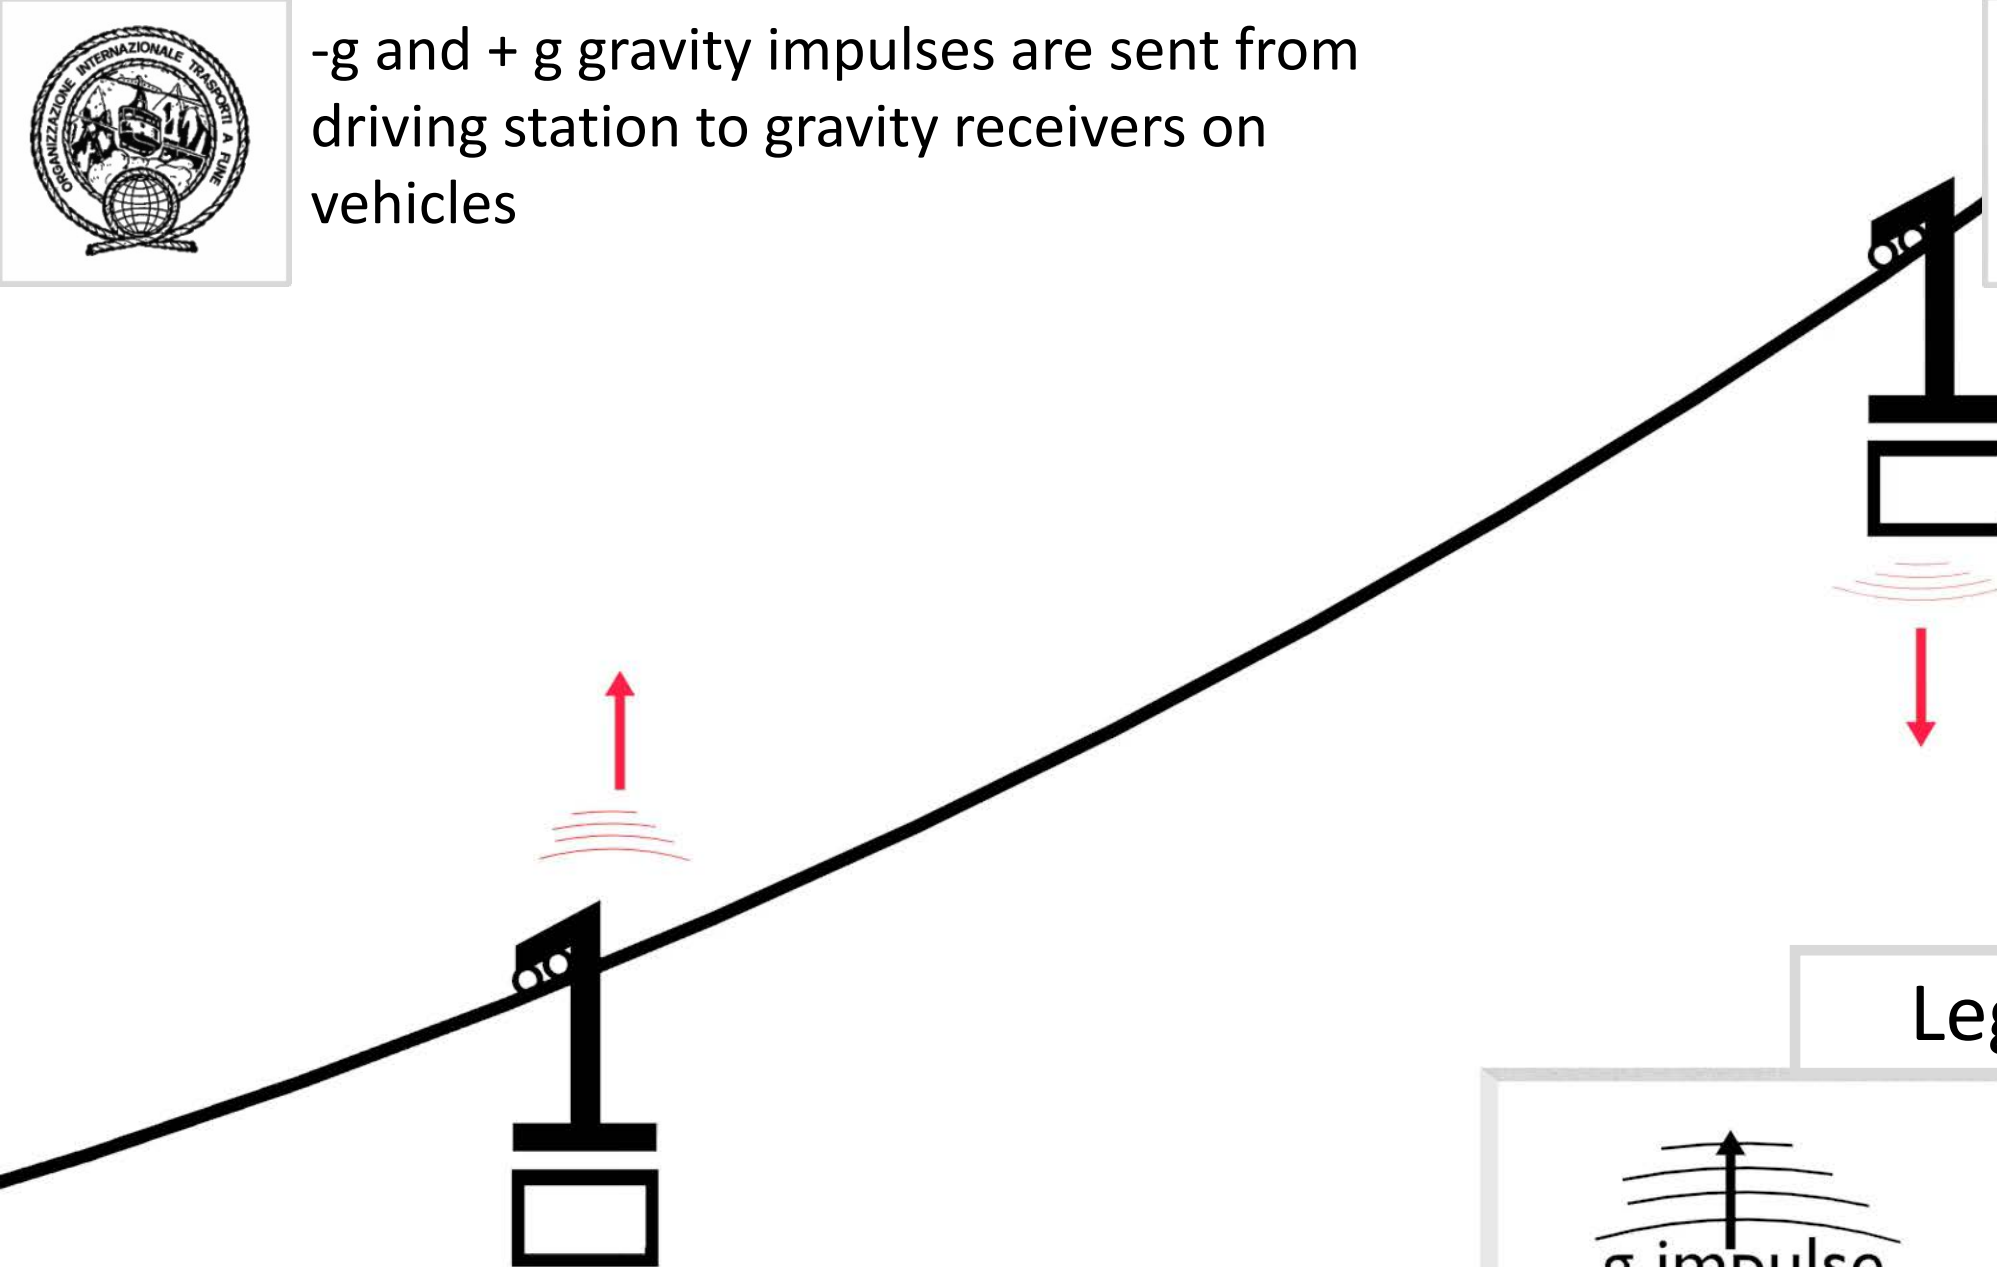

Gravity drive

positive or negative modulated
gravity impulses
are sent
from driving station
to gravity receivers on each vehicle

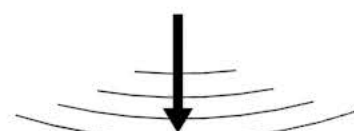

-g and + g gravity impulses are sent from driving station to gravity receivers on vehicles

Legend

- g impulse

+ g impulse

Let's look once more
at the crowd in Walther Platz,
with a magnifying glass:
in the middle of the people,
we can recognize two
persons we all well know.
