| Autumn 2024 | 17.-18.09.2024 | Telfs / Leitner Inc. | On the first day there was a meeting from 9:00 a.m. to 5:00 p.m. including a visit to the Leitner company<br>On the second day the session was from 9:00 am to 1:00 pm |

## RESUME

**The rope study group has been working hard on finalising the OITAF recommendation 'Rope service life of ropeway ropes' / 'Life time book' in English and the German translation. It is planned to finalise this in German and English in 2025 so that it can be translated into other languages and then made available to the public.**
**In preparation for our next topic of testing magnetic rope testing with half-coil technology, we heard presentations from Renato and Manlio Toros from ANITIF on their developments and experiences with this technology as a guest speaker at the spring meeting. In the spring and autumn meetings, we also heard presentations on the OITAF study on 'Magnetic rope testing with half-coil technology' by the University of Stuttgart and the LATIF from Trento on the test plan and the findings to be gained from it, including the timetable.**
**During the spring meeting we had a technical tour of the Prada - Costabella basket cableway and during the autumn meeting we visited the production facility of Leitner GmbH in Telfs.**
